Yacht design, Interior Design & engineering > Alberto Simeone

The **MY47P** is a super-fast, no compromise powerboat that delivers amazing performance with clean, flowing and minimalistic lines.

The stepped hull allows for control and comfort at higher speeds, thanks to the reduced trim and wetted surface area, making your voyage fast, safe and enjoyable.

Guests may lounge on the two large sunbeds fore and aft, bathe from the swim platforms on both sides of the yacht, or dine in the cockpit, equipped with cooktop, fridges and comfortable seats, designed for the vessel's high performance.

The 4 x MERCURY 500R outboard engines not only power this amazing craft but also allow for maximized interior and exterior spaces.

The **interiors** provide accomodation up to four guests, with the optional aft cabin and everything needed for this type of boat.

A **master cabin** at the foremost part of the yacht, equipped with king size bed, various lockers and private head with separate shower stall.

< Master Cabin

Aftward it is possible to add a **guests' cabin**, with a separate access, double beds and a private head.

< Aft Cabin
